

# Mobile HMI Access Made Easy

*Free*  
*Safety Features*

*Independent Use*

*Multi-User*

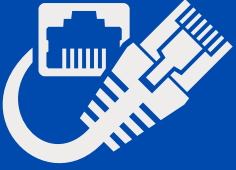

**Use your phone, tablet, or PC as the HMI**

**True independent, multi-user access allows operators, supervisors, maintenance, or other personnel to interact with the HMI simultaneously.**

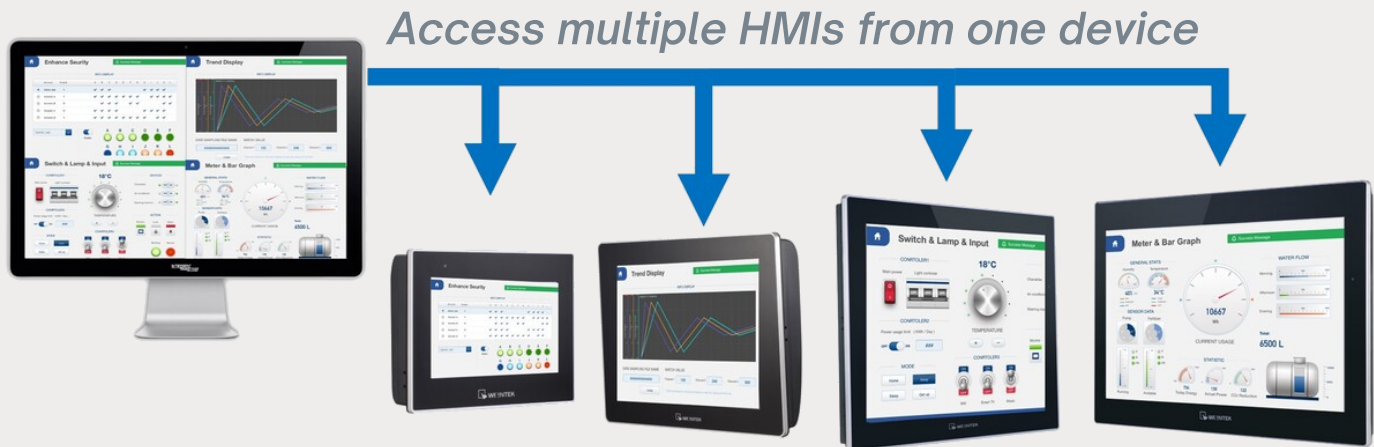

Use your existing Wireless Network to access your HMI from Mobile Devices or PC

Use your existing Wired Network to access your HMI from a PC

# Mobile HMI Access for the Industry 4.0 era

No internet required – Use your local network to connect to the HMI  
No web servers to setup – speed up development time and eliminate latency

12 Available Levels of Password Security ensure safe remote access for:

Remote control

Commissioning

Data history &  
trend access

Alarm viewing &  
acknowledgement

Event logs

...and more!

Quickly and easily start using your device as the HMI with the following steps:

1. Download cMT viewer from the Apple and Android stores or our website for PC use
2. Set your device up on the same network as the HMI  
This could be a plant network, control cabinet network, or the HMI itself
3. Open cMT Viewer
4. Select the HMI you wish to connect to
5. Enter the HMI's password
6. Use your device as a new instance of the HMI
