

# WEINTEK USA - ENGINEERS ON-DEMAND

**Engineering Services: Beyond Tech Support**  
by Weintek USA and Automation Experts.

## Improve production efficiency and reliability with Weintek's Industrial Internet of Things (IIoT) Solutions.

### Increase Productivity

We will specify and design instrumentation to meet your needs and optimize your process for efficiency and reliability.

### Utilize our Pool of Approved System Integration Partners

Access a community of knowledgeable and experienced engineers and System Integrators across the country.

### Increase Productivity and IIoT Capabilities

We will help you reduce waste and stay ahead of the competition through state-of-the-art automation. Qualified projects will be carefully recorded in a Statement of Work (SoW). The SoW will cover:

- Controls Integration Details
- Project IIoT Solutions
- Project Management Deliverables
- Onsite/Remote Training Details
- Control Panel Fabrication Design Details
- Etc.

### Dedicated Project Management

Qualified projects are assigned a Weintek USA project manager to ensure all items in the SoW are executed on time and as agreed.

### Intellectual Property (IP)

All qualified projects will be protected under Non-Disclosure Agreements (NDAs).
