EasyBuilder X Announcement

DATE: 10/5/2026

About This Announcement

You may have seen the EasyBuilder X announcement below. This announcement originated from our Taiwan branch and has been shared by some of our global partners, not Weintek USA.

Weintek officially introduces **EasyBuilder X**, its new HMI visualization and programming software, giving automation engineers a more efficient and flexible platform for HMI development.

EasyBuilder X Availability in North America

Weintek USA has not officially released EasyBuilder X in North America.

It is highly recommended to continue using EasyBuilder Pro for HMI development until it's official U.S. release. EasyBuilder Pro has a broad feature set, years of proven stability and is fully supported by Weintek USA. It will continue to be supported alongside EBX so you can be confident in the software for years to come.

> **KEY INFORMATION**
> EasyBuilder X has not yet been officially released in North America. Please continue using EasyBuilder Pro until further notice.

For more information regarding EBX, please contact your technical representative.

Sincerely,
WEINTEK USA, INC.
